

HYDRASOAR®

HydraSoar® Flow-thru Extension Poles

Model #8506 - 3'-6', Model #8508 - 4'-8' & Model #8512 - 6'-12'

HydraSoar extends your reach for difficult exterior cleaning jobs. Excellent for cleaning windows, awnings, solar panels, boats, automobiles and other large vehicles. HydraSoar attaches to a standard garden hose and is complete with a water control shut-off valve to help conserve water. The HydraSoar handle is well insulated with a non-slip foam grip and utilizes an external chuck and collet locking device. Two section poles are available in three lengths and fit all of our chemical resistant, flow-thru cleaning brushes. PACK QTY: 6

10" brushes are sold separately and available in regular and bi-level styles with several fiber choices.

Flow-thru Angle Adaptor

Model #0425

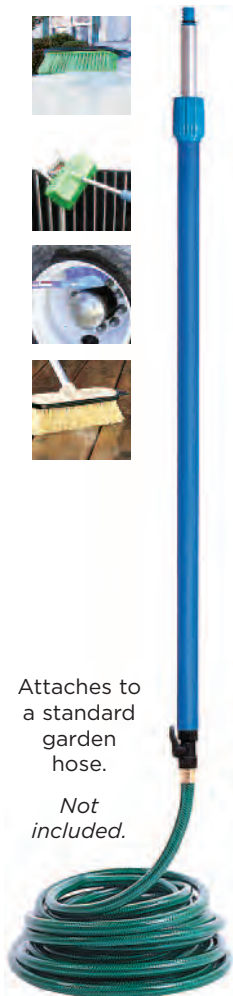

Our flow-thru angle adaptor allows the user to change the angle of the brush for easier cleaning. It can also be used without a brush to redirect the flow of the water for cleaning gutters or even watering plants.

PACK QTY: 6

Attaches to a standard garden hose.

Not included.
