

# SUPER TWIST-LOK® EXTENSION POLES

*All weights and specifications are approximate.*

## AUDIBLE LOCK.

Super Twist-Lok's bi-directional lock lets you know with a click that its locked. The all fiberglass construction of this pole makes it very rigid and a favorite among professionals.

### ★★★★★ CUSTOMER REVIEW

*"I have 23 years experience painting and am all about efficiency and the perfect tool . . . With the internal locking mechanism it is a simple twist to unlock, adjust and relock. There is no preset drilled hole for what length you have to set it. So you can adjust it to be as long as possible in tight spaces."*
